Athens, 22/11/2018 Cert.Num: 1819-C00350

CERTIFICATE OF ANALYSIS

Analysis Date: 22/11/2018 Brand Name: ELIAMA GOLD Owner: TITAKI ELLISAVET

Variety: KORONEIKI

Origin: MOIRES IRAKLION GREECE

Chemical Analysis

magiatis@pharm.uoa.gr

Oleocanthal	285	mg/Kg
Oleacein	158	mg/Kg
Oleocanthal + Oleacein (index D1)	443	mg/Kg
Ligstroside aglycon (monoaldehyde form)	81	mg/Kg
Oleuropein aglycon (monoaldehyde form)	102	mg/Kg
Ligstroside aglycon (dialdehyde form)	321	mg/Kg
Oleuropein aglycon (dialdehyde form)	251	mg/Kg
Total tyrosol derivatives	687	mg/Kg
Total hydroxytyrosol derivatives	510	mg/Kg
Total phenols analyzed	1.197	mg/Kg

Comments:

The levels of oleocanthal and oleacein are higher than the average values (135 and 105 mg/Kg respectively) the sample included in the international study performed at the University of California, Davis.

The daily consumption of 20 g of the analyzed olive oil provides 23.9 mg of hydroxytyrosol, tyrosol or their derivatives. Olive oils that contain >5 mg per 20 gr belong to the category of oils that protect the blood lipids from oxidative stress according to the Regulation 432/2012 of the European Union.

It should be noted that oleocanthal and oleacein present important biological activity and they have been related with anti-inflammatory, antioxidant, cardioprotective and neuroprotective activity.

The chemical analysis was performed according to the method published in J.Agric. Food Chem., 2012, 60 (47), pp 11696-11703, J.Agric. Food Chem., 2014 62 (3), 600-607 and OLIVAE, 2015, 122, 22-33.
